Will I graduate with debt?

High percentages of doctoral students who graduated in 2013 and 2014 have graduate loan debt.^a

What will I owe upon graduation?

Median graduate loan debt (not undergrad) for 2013-14 graduates is reported. PsyDs tend to owe more than PhDs, and HSP owe more than SRO students.^a

How will my debt grow?

After 10 Years

After 25 Years

Due to interest, the amount you owe is more than the amount you borrow. Here, we assume a 6.4% interest rate.^b

What will I pay monthly?

10-Year Plan

25-Year Plan

You may be eligible for income-based and other types of repayment. The longer you repay, the more interest you will pay back.^b

How much will I earn?

Median full-time (non post-doc) annual salaries are reported for doctorates 2010-2014.^a

Give me your 5 best tips!

1. Know what you owe! Face your federal loan debt at nslds.ed.gov so you can make a plan.
2. Minimize debt by trying to live frugally.
3. Try to pay your interest as it accumulates so it will not be added to your principal.
4. Look for repayment options before you graduate at studentaid.ed.gov.
5. Beware of private (non-federal) loans.
