

Education and Training Awards Committee 2004 Annual Report

Education and Training Awards are given each year to two individuals who have made exemplary professional contributions to the improvement of education and training at any level from preschool to postgraduate education. The purposes of these awards are to recognize outstanding psychologists for their work in education and training, make a visible, public commitment by the APA to fostering quality education and training, and encourage more psychologists to work toward the enhancement of teaching and learning. These awards are consistent with the philosophy and goals of the Board of Educational Affairs (BEA).
