PSICOLOGIA E LEGGE

Applicazioni Interdisciplinari

INTRODUZIONE

Il database bibliografico PsycINFO, prodotto dall'American Psychological Association, può offrire molte opportunità ai ricercatori, alle facoltà, agli studenti e ai professionisti in un ampio spettro di discipline. PsycINFO è uno strumento di ricerca ineguagliabile per la psicologia e le scienze del comportamento. Ma la sua attinenza con altre discipline, come quelle legali, è sempre più importante — i professionisti in campo legale vi troveranno una letteratura preziosa, aggiornata e pratica. Tra gli argomenti presenti nel database si trovano la legislazione civile e criminale, la psicologia forense, la selezione delle giurie, le testimonianze degli esperti, l'autorità di polizia, il controllo delle armi, la giustizia giovanile — oltre a una moltitudine di altri temi.
