PsycINFO® PSYCHOLOGIE MILITAIRE

Applications interdisciplinaires

INTRODUCTION

PsycINFO constitue une source importante de renseignements bibliographiques, notamment sur la psychologie militaire, qui compte parmi les premiers champs d'activité de la recherche appliquée en psychologie. Les chercheurs qui s'intéressent au stress de combat, à l'entraînement en vue d'un combat, à l'opinion publique concernant la guerre, au perfectionnement professionnel et au processus décisionnel associé au domaine militaire seront en mesure d'y dénicher des documents de recherche indispensables.

La base de données bibliographiques PsycINFO, publiée par l'American Psychological Association, est une source de renseignements fort utilisée par les psychologues. Comportant plus de 2 millions de résumés d'articles tirés de plus de 2 000 revues spécialisées publiées à l'échelle mondiale, PsycINFO offre des avantages pratiques aux professionnels de la santé œuvrant dans le domaine militaire, aux psychologues militaires et aux chercheurs spécialisés en questions relatives aux anciens combattants.
