# PSICOLOGIA MILITARE

Applicazioni interdisciplinari

## INTRODUZIONE

La psicologia militare è stata una delle prime applicazioni della ricerca psicologica e PsycINFO offre un'inesauribile quantità di informazioni bibliografiche. I ricercatori interessati allo stress da combattimento, all'addestramento per la battaglia, alla pubblica opinione a proposito della guerra, allo sviluppo della carriera e ai processi decisionali applicati alla sfera militare potranno trovare qui importanti materiali di studio.

Publicato dall'American Psychological Association, il database bibliografico PsycINFO è una fonte di informazioni ampiamente utilizzata dagli psicologi. Con oltre 2 milioni di estratti da oltre 2.000 pubblicazioni provenienti da tutto il mondo, PsycINFO può dare un grande aiuto ai professionisti che operano in ambiente militare, agli psicologi militari o ai ricercatori specializzati nel trattamento dei veterani di guerra.
