**Public Health Resources in PsycINFO**

**Topics in PsycINFO of Relevance to Public Health**

PsycINFO is a research database published by the American Psychological Association. Professionals working in public health can use it to find research on the psychological underpinnings of health and wellness behaviors.

**Sample Searches in Public Health**

**Scenario:** A new nurse working as a community health educator is interested in learning more about people's knowledge of and attitudes toward HPV.

**Search:** (Health Knowledge OR Health Attitudes) AND Human Papillomavirus

**Results:** Journal articles and dissertations exploring what people know and what they believe about HPV infection and vaccines. Populations addressed include college students, rural and urban women, and different ethnic and cultural groups.

**Scenario:** A medical student studying a recent measles outbreak is investigating why people decline vaccinations.

**Search:** Immunization AND Risk Perception

**Results:** Articles exploring the beliefs a variety of populations hold regarding immunizations. Includes studies looking at the attitudes of health care workers and parents, and articles focused on the H1N1 vaccine.

**Scenario:** A public health nurse has been asked by the director of a local community center to help develop a program to promote the benefits of basic cleanliness and personal care.

**Search:** Hygiene AND Health Promotion

**Results:** Articles evaluating a variety of educational approaches to promoting better hygiene. Includes studies looking at hand washing behaviors, oral health and more.
