

APA Resources for Undergraduate Educators

APA regularly develops resources to support undergraduate educators in their teaching and mentoring of students.

APA's undergraduate psychology resources can help you:

- Align your departmental policies and curriculum with APA's policy documents related to undergraduate education
 - » *Principles for Quality Undergraduate Education in Psychology, Guidelines for the Undergraduate Psychology Major, and Student Learning Outcomes for Introductory Psychology*
- Transform your introductory psychology course through access to **free** pre-recorded webinars and sample syllabi
- Gain **free** access to a collaboratively developed digital library of learning assessments (e.g., assignments, quizzes, evaluations) designed to help psychology instructors demonstrate evidence of teaching and learning effectiveness
- Incorporate the science of learning into your courses to promote student success
- Support students in their career exploration and help them to understand how their skills, degree, experiences, and brand prepare them to land a job or enter a field of graduate study that is the right fit for them
- Learn about annual awards for educators and undergraduate students
