Conant

Hononegah

* The objectives of these sessions are to:

- Share and explore engaging, standards-aligned psychology lessons that incorporate interactive and experiential learning strategies to enhance student understanding.
- Provide teachers with ready-to-use, content-specific and skill-focused materials that support best practices and can be immediately implemented in the classroom.

Lessons may focus on content-specific topics or skill development and can take various forms, including activities, simulations, demonstrations, student practice, assessments, projects, and instructional strategies. Teachers may share case studies, role-playing exercises, debates, interactive notes, graphic organizers, gamified learning experiences, collaborative learning activities, media and pop culture analyses, experiential learning opportunities, differentiation strategies, cross-curricular connections, self-reflection and journaling prompts, ethical discussions, mindfulness and mental health activities, data analysis exercises, mock research studies, experiment design tasks, and innovative assessment strategies.

CHITOPSS is not formally affiliated with the American Psychological Association (APA), but is recognized by APA as a local group/conference for high school psychology teachers. The TOPSS initials are a registered trademark of APA and are used with its permission.
