Industry

PSYCHOLOGY OF AGING

Apply knowledge and methods of psychology to understanding and helping older adults and their families achieve well-being in later life.

DYNAMIC

Training in psychology and aging prepares you to do research, teach, clinical practice, engage in advocacy, train psychologists--you can have many roles!

WIDE RANGE OF WORK

Work in depression, anxiety, medical conditions, family relationships, retirement, cognition, sexuality, poverty--you can find your niche.

MARKETABLE

The National Institute on Aging estimates that 5,000 full-time, doctoral-level geropsychologists will be needed by 2020.

INTERPROFESSIONAL

Work with different disciplines to accomplish goals, including medical, social work, research, community, and public policy professionals.

Percent of U.S.
Population Age 65+

CAREERS IN DEMAND

People 65+ are the fastest growing segment of the U.S. population. Career opportunities for students interested in psychology and aging are expanding.
