## Written Statement

Please provide a 2-page overview that shows how the school as a whole applies each of the two principles of managing student behavior. The statement must include an explanation of how the two specific principles are enacted.

**PLEASE UPLOAD PDFS ONLY**

## Evidence

For each of the two principles, please provide at least one piece of evidence that demonstrates specifically how these principles have been enacted at a school-wide level (i.e., not just in a few classrooms). **Please do not exceed 2 pieces of evidence per principle.** We also encourage you to submit a plan for continued and enhanced integration of these principles into your school community and culture. On the summary table below, please indicate what document(s) you are using as sources of evidence to illustrate the principle and the specific pages where we can find the evidence. Evidence might include the following (this is not an exhaustive list -- these are examples of sources of evidence!):

- Changes in school policy on promoting classroom management, and a one page follow up on how data were used as a basis for making those changes
- School improvement plans with a one-page description of resulting changes from their implementation
- A brief summary of results from teacher or student surveys and how these findings were used to promote effective classroom management
- Agendas for professional development or professional learning opportunities and a one-page description of resulting changes that evolved from those experiences
- Rubrics for how teachers are evaluated, and how this rubric is used to elicit professional development or interventions related to promoting and managing student behavior
- External recognition of your school's application of these two principles
