OPENING SESSION PLENARY

Work & Mental Health: Developing an Integrated Intervention Approach
Anthony D. LaMontagne, ScD, MA, MEd, is an associate professor and deputy director of the McCaughey VicHealth Centre for Community Wellbeing at the University of Melbourne’s School of Population and Global Health. His background includes a bachelor of science degree from the University of Massachusetts (1982), master’s degrees in molecular toxicology from Harvard University (1987) and science and adult basic education from the University of Massachusetts (1988), and a doctor of science in occupational health from the Harvard School of Public Health (1994).

His broad research interest is in developing the scientific and public understanding of work as a social determinant of health and translating this research into policy and practice to improve workplace and worker health. He has an international profile for cross-disciplinary applied epidemiology and intervention research in occupational health and safety and health promotion. Specific areas of intervention research expertise include promoting workplace mental health, improving job quality and psychosocial working conditions, and evaluating government policy interventions.

LUNCHEON TUTORIALS

An Epidemiology Primer for Occupational Health Researchers and Practitioners
Amanda Sonnega, PhD, received her doctoral degree from Johns Hopkins University School of Public Health in health psychology. She completed a postdoctoral fellowship in psychiatric epidemiology at the Institute for Social Research (ISR) at the University of Michigan. She is an assistant research scientist at ISR, where she is responsible for integrating communication, outreach, and education efforts for the Health and Retirement Study, and she is a lecturer in the UM School of Public Health, where she teaches a class on psychosocial factors in health-related behavior. Her research focuses on vulnerability and resilience in aging individuals and the role of intergenerational transfers in retirement well-being.

Applied Research and Consulting Opportunities in Occupational Safety and Health
Joel Bennett, PhD, is president of Organizational Wellness & Learning Systems (OWLS), a consulting firm that specializes in evidence-based wellness and e-learning technologies to promote organizational health and employee well-being. Dr. Bennett first delivered stress management programming in 1985, and OWLS programs have since reached over 20,000 workers across the United States. He is primary developer of “Team Awareness,” an evidence-based program recognized by the U.S. Department of Health and Human Services as effective in reducing employee behavioral risks. Team Awareness has been adapted by the U.S. National Guard as one of their flagship prevention programs, and it has been used by restaurants, electrician training centers, small businesses, and Native American tribal government and has recently been used in South Africa. OWLS clients include corporate, private, nonprofit, local, and federal agencies. OWLS has received close to $4 million in federal research grants to assess, design, and deliver workplace wellness programs. The OWLS service line includes the Small Business Wellness Initiative, IntelliPrev™, PrevTools™, and ExecuPrev™. Dr. Bennett is the author of over 20 peer-reviewed research articles and has authored/coauthored three books, including Heart-Centered Leadership, Time & Intimacy, and Preventing Workplace Substance Abuse. In 2008, he received the Service Leadership award from the National Wellness Institute. He earned his bachelor’s degree in psychology and philosophy from the State University of New York (Purchase) and his MA and PhD in psychology from the University of Texas at Austin.

Autumn Krauss, PhD, is chief scientist at Sentis. In her role, she manages Sentis’s global research team, who partner with clients to conduct safety culture audits, safety leadership assessments, and health and well-being interventions. She also works directly with individual organizations and industry associations to conduct workshops and presentations on the psychology of workplace safety and health. Dr. Krauss is the director of the Sentis Academy, which includes all of Sentis’s research internships and university partnerships. The Sentis Academy’s current research program, in collaboration with the University of South Australia, investigates the factors that predict whether safety training is used on the job. She holds a PhD in industrial and organizational (I/O) psychology from Colorado State University.

Kizzy Parks, PhD, is president of K. Parks Consulting, Inc., an 8(a) certified woman-minority owned/operated small business providing full-service analytics and metrics services, recruiting, training and development, and workforce consulting. The firm specializes in helping organizations create a high-performance workforce, providing customized business solutions based on business management principles and practical knowledge and experience. The firm’s areas of expertise include organizational wellness and effectiveness, diversity and inclusion solutions, organizational assessments and metrics development, and training and development. The firm has provided services to the Department of Defense, the Defense Equal Opportunity Management Institute, and several Fortune 500 companies. In addition to leading successful consulting initiatives, Dr. Parks collaborates on numerous research teams and focuses on research in evaluating organizational development solutions, diversity and inclusion management, and organizational wellness and effectiveness. She received her MS and PhD in I/O psychology from the Florida Institute of Technology.
Stephanie Pronk, MA, is a senior vice president at Aon Hewitt, where she leads their national clinical health improvement and measurement team. Ms. Pronk combines more than 25 years of experience in developing, implementing, and evaluating health improvement strategies both domestically and globally. She uses the power of data analytics to provide evidence-based health solutions for clients that improve health and productivity and have a positive impact on the bottom line. Before joining Aon Hewitt, she served as vice president of employer and health management consulting at Ingenix. She also served as the chief health officer for RedBrick Health, where she was responsible for developing and executing the health and consumer engagement strategies of the company. She developed and led national health management consulting operations for various human capital consulting organizations, including Watson Wyatt and William M. Mercer. In this role, she helped clients find new approaches to improving, maintaining, and managing health by focusing on the complete spectrum of health conditions—from prevention to risk reduction to disease management. Ms. Pronk also brings actual hands-on experience in developing, implementing, and evaluating health promotion programs at Westinghouse Electric Corporation, where she was nationally recognized for her innovative program design and results. She began her career teaching health-related courses at the university level and conducted research in the areas of obesity and physical activity. She holds a bachelor’s degree in physical education and health from Hastings College and a master’s degree in health education from the University of Nebraska at Kearney (formally Kearney State College).

Douglas Roblin, PhD, is a senior research scientist with the Center for Health Research/Southeast at Kaiser Permanente Georgia. He is also an adjunct assistant professor in health policy and management in the Rollins School of Public Health at Emory University. His principal research interests focus on organization and financing of health care delivery systems, social epidemiology, and evaluation of the influence of psychosocial factors on patient lifestyle, medication adherence, and health care utilization. He has over 2 decades of experience working as a statistician, health economist, and research investigator in health care organizations. Dr. Roblin is principal investigator on a project funded by the National Institute of Diabetes and Digestive and Kidney Diseases and on another funded by the American Cancer Society. He is the site investigator for the HMO Cancer Research Network and the HMO Cancer Communication Research Network. Dr. Roblin is site investigator for research studies of patient–provider communication, the health and consumer engagement strategies of the company. He developed and led national health management consulting operations for various human capital consulting organizations, including Watson Wyatt and William M. Mercer. In this role, she helped clients find new approaches to improving, maintaining, and managing health by focusing on the complete spectrum of health conditions—from prevention to risk reduction to disease management. Ms. Pronk also brings actual hands-on experience in developing, implementing, and evaluating health promotion programs at Westinghouse Electric Corporation, where she was nationally recognized for her innovative program design and results. She began her career teaching health-related courses at the university level and conducted research in the areas of obesity and physical activity. She holds a bachelor’s degree in physical education and health from Hastings College and a master’s degree in health education from the University of Nebraska at Kearney (formally Kearney State College).

Lindsay Sears, PhD, is an executive director principal investigator responsible for advanced well-being research and custom analytics at Healthways, the largest independent global provider of Well-Being improvement solutions. She leads a research team primarily focused on the Healthways Well-Being Assessment and the Gallup-Healthways Well-Being Index. She and her team provide data-driven insights and recommendations to clients of Healthways and to internal product development and product design groups. Dr. Sears has published several book chapters and research articles on employee well-being, stress, performance, and retention and is passionate about applying science in the discovery of new insights and opportunities to improve people’s lives. Before joining Healthways in 2010, she spent several years as a consultant to human resource and organizational development groups. She earned her undergraduate degree in psychology from Rhodes College, her master’s in I/O psychology from Portland State University, and her PhD in I/O psychology from Clemson University.

**Measuring Biomarkers of Stress: A Workshop for Researchers Wanting to Expand Their Methodological Toolkit in Occupational Health**

Diane B. Miller, PhD, is currently the head of the Chronic Stress & Neurotoxicology Laboratory of CDC-NIOSH at the NIOSH facility in Morgantown, WV. She received her doctorate in experimental psychology and psychopharmacology from the University of Kentucky in 1979. Before joining NIOSH, she was a senior research toxicologist at the U.S. Environmental Protection Agency, where she evaluated the impact of diverse classes of compounds, including toxic chemicals, pharmacological agents, and drugs of abuse on the adult and developing nervous system. She has also investigated the role pesticides and other chemicals may play in the etiology of neurodegenerative diseases like Alzheimer’s and Parkinson’s. Her current research utilizes human populations considered to have high levels of occupational stress such as police officers as well as experimental animal models of stress. The release of certain hormones and other biologically active agents is an integral part of the stress response. A particular interest and focus of her research program is the biological mechanism by which substances like cortisol and catecholamines, released in response to stressor exposure, impact disease development. She is an associate editor of the International Journal of Stress Management and on the editorial boards of Neurotoxicology & Teratology and the Journal of Drug and Alcohol Research. Dr. Miller has authored over 100 papers in relevant peer-reviewed journals, including Brain Research, the Journal of Neurochemistry, and the Journal of Occupational and Environmental Medicine.
Publishing in the Journal of Occupational Health Psychology: Questions From Prospective Authors

Joseph J. Hurrell Jr., PhD, is an adjunct professor of psychology at St. Mary's University in Halifax, Nova Scotia. He is the editor of the Journal of Occupational Health Psychology and holds BA and PhD degrees in psychology from Miami University and a master's in clinical psychology from Xavier University. He was previously affiliated with the CDC's NIOSH. He joined NIOSH in 1972 and was a pioneer in the study of psychological factors in occupational health. His leadership helped foster the now widespread international recognition of work-related psychological disorders as a major public health problem, and his research has led to the identification of a wide variety of work-related psychosocial conditions that serve as risk factors for psychological and physical ill health. Before retiring from NIOSH, he was the associate director for science for the Division of Surveillance, Hazard Evaluations and Field Studies, one of the largest divisions of CDC-NIOSH. In this capacity, Dr. Hurrell was responsible for the scientific quality of over 150 ongoing studies addressing a broad range of questions of substantial public health and regulatory importance. Dr. Hurrell has authored over 100 scientific publications and 8 books. He was a co-founder of the APA's Journal of Occupational Health Psychology and served as its associate editor for over 10 years. He is also a founding member of the Society of Occupational Health Psychology. Dr. Hurrell has been internationally recognized for his work and is the recipient of numerous awards, including the NIOSH Alice Hamilton Award that recognizes excellence in publications by NIOSH scientists.

Innovations in Work-Family Research, Practice, and Policy: Effects on Total Worker Health™

Leslie B. Hammer, PhD, is a professor of psychology at Portland State University and a fellow of the Society for Industrial and Organizational Psychology (SIOP). Her research focuses on ways in which organizations can help reduce work and family stress and improve positive spillover by facilitating both formal and informal workplace supports. Dr. Hammer is the director of the Center for Work-Family Stress, Safety, and Health, funded by grants from the National Institute for Child Health and Human Development and NIOSH. This center is one of six that make up the national Work, Family, and Health Network. She is also the director of the Occupational Health Psychology graduate training program at Portland State University that is funded through a NIOSH training program grant. She is the associate director of the NIOSH-funded Oregon Healthy Workforce Center, one of four centers of excellence in Total Worker Health™. She is a past founding president of the Society for Occupational Health Psychology. Dr. Hammer is on the editorial boards of the Journal of Occupational Health Psychology (past associate editor), Journal of Management, Journal of Business and Psychology, and Journal of Occupational and Organizational Psychology. She has published numerous articles on work and family in such publications as the Journal of Applied Psychology, Journal of Occupational Health Psychology, Journal of Vocational Behavior, Journal of Family Issues, Human Resource Planning, and Journal of Marriage and the Family and cowrote a book with Margaret Neal, PhD, titled Working Couples Caring for Children and Aging Couples: Effects on Work and Well-Being.

Health-Related Quality of Life: Common Measurement Practices and Their Applicability Towards Research in Work Stress

Tapas K. Ray, PhD, is as an economist with CDC-NIOSH. He received his PhD in economics from the University of Connecticut in 2004 and his master's from the Delhi School of Economics in 1996. Before joining the CDC as a prevention effectiveness fellow, he worked in the field of environmental and regulatory economics. His current interests are economics of work stress, musculoskeletal disorders, occupational exposures to electromagnetic fields, and identification of macroeconomic factors contributing to injuries and illnesses in the U.S. manufacturing sector. He has published in both environmental and public health economics.

State of the Art in Safety Climate Research

Dov Zohar, PhD, is a professor at the Faculty of Management, Technion – Israel Institute of Technology. He also holds a joint research appointment at the Liberty Mutual Research Institute for Safety in Hopkinton, MA. Dr. Zohar published the original paper on safety climate, which defined the concept and offered a measurement scale that has become the standard in this field. Since then, he has conducted numerous research and consulting projects in various countries that have been published in scientific and professional journals. His recent work focuses on the relationship between safety climate and culture and on a new model linking organizational climate and culture as levers for organizational safety improvement. This work has won the Human Factors & Ergonomics Jerome Ely Award for Outstanding Scientific Contribution in 1981, the CDC/NIOSH Best Safety Intervention Award in 2003, and the APA Lifetime Achievement Award in 2008. He is also a fellow of SIOP.

Succeeding as a Spokesperson for Occupational Health: Preparing for News Media Interviews

Rhea K. Farberman, APR, is the executive director for Public and Member Communications at the American Psychological Association. Ms. Farberman manages the APA staff responsible for the association’s outreach and response to news media and oversees its magazines and website. She has worked as a media relations professional for 25 years, representing academic, federal government, and nonprofit entities to the news media. She is frequently quoted in the national media on psychology topics as APA’s spokesperson. She earned a BA in communications from the American University in Washington, DC, and completed graduate studies at the George Washington University. She is an accredited member of the Public Relations Society of America.

  • Michael E. Andrew, PhD, NIOSH, Morgantown, WV; Anna Mnatsakanova, MA; Cecil M. Burchfiel, PhD; Luenda E. Charles, PhD; Tara A. Hartley, PhD; Ja K. Gu, MSPH; John M. Violanti, PhD

G5 Learning From Reported Critical Incidents Towards Designing Tertiary Prevention Strategies for At-Risk Police Officers
  • Jessica S. Dunn, MSc, Assistant Professor, Institute of Work, Health and Organisations, University of Nottingham Malaysia Campus; N. Hunt; A. Santos

Finalist for Best Student Research Award
Psychological and Biological Effects of Stress in Emergency Personnel

H1 Occupational Stress, Overweight and Tobacco: Cardiovascular Risk Factors Observed in Paramedics From Quebec
  • Sandrine Hegg-Deloye, MSc, Université Laval, Québec, QC, Canada; Patrice Brassard, PhD; Jérôme Prairie, MSc; Dominique Larouche, BSc; Nathalie Jauvin, PhD; Paul Poirier, MD, PhD; Angelo Tremblay, PhD; Philippe Corbeil, PhD

H2 A Low Hierarchical Support at Work Increases the Risk of Overweight
  • Sandrine Hegg-Deloye, MSc, Université Laval, Québec, QC, Canada; Patrice Brassard, PhD; Jérôme Prairie, MSc; Dominique Larouche, BSc; Nathalie Jauvin, PhD; Pierre-Hugues Carmichael; Paul Poirier, MD, PhD; Angelo Tremblay, PhD; Philippe Corbeil, PhD

H3 Addressing Suicide in the Law Enforcement Agency: Recommendations for Best Practices
  • Holly M. Wohlers, MS, University of Wisconsin–Milwaukee, WI; Leah Rouse Arndt, PhD; Marisela Lopez, MS; Rae Anne Frey, BS; Katelyn Llewellyn, BS; Sonia Pinero, BS; Ia Xiong, doctoral candidate; Stephen Wester, PhD

H4 Effects of the Work Environment on Nurse Burnout in Emergency Department
  • Ayda Kebapci, BSN, MSN, School Of Nursing, Koç University, Istanbul, Turkey; Neriman Akyolcu, BSN, MSN, PhD

Theoretical and Conceptual Issues in Job Stress

I1 Quest for Happiness: How Much Does Work Matter?
  • Mélissa Campbell, MSc, University of Quebec in Outaouais, Canada; Eric Gosselin, PhD

I2 Psychological Detachment From Work: Construct Definition, Scale Development, and Factor Validation
  • Jessica R. Petor, BS, Northern Kentucky University, Highland Heights, KY; Philip J. Moberg, PhD

I3 Investigating Job Insecurity Climate From a Multilevel Perspective: Outcomes and Methodological Challenges
  • Lena Låstad, PhD candidate, Stockholm University, Sweden; Aram Seddigh, PhD candidate; Erik Berntson, Associate Professor; Katharina Nåswall, Associate Professor; Hugo Westerlund, Professor; Magnus Sverke, Professor

I4 Relation Between Risk Factor(s), Mental Distress and Satisfaction at Work
  • Matthieu Poirot, PhD, Midori Consulting, Paris, France; Vanessa Boissant, MD

I5 Job Strain, Individualism–Collectivism, and Mental Health in Colombian Workers
  • Boris E. Cendales, Sociologist, Universidad de Los Andes, Bogota, Colombia; Viviola Gomez, PhD

I6 Need Satisfaction as a Mediator of the Relationship Between Recovery Experiences and Strain
  • Lisa M. Perez, PhD, Minnesota State University, Mankato, MN; Paige Woodruff, MA; Marilyn L. Fox, PhD

I7 The Adaptation Model of Job Stress: Developing a Conceptual Model
  • Jeremy D. Mackey, MBA, Florida State University, Tallahassee, FL; Pamela L. Perrewé, PhD; James A. Meurs, PhD

I8 Technostress: Day-Level Effects of an Accelerating Pace of Technological Change
  • Roman Prem, Mag., University of Vienna, Austria; Prof. Christian Korkun; Dr. Bettina Kubicek

Job Attitudes, Turnover, and Retention

J1 Going the Extra Mile: Effects of Sex and Organizational Citizenship Behavior Type on Perceived Competence
  • Lindsay Bryson, BA (Hons), Saint Mary’s University, Halifax, NS, Canada; Joanna Solomon, BSc (Hons); Lucie Kocum, PhD; Camilla Holmwall, PhD
