**APA Committee on Aging (CONA) 2019 Conversation Hour and Award Presentation:**
*The Future of Aging and Technology: How will Technology Support Older Adults in the Year 2050?*
5:30 – 7:00 pm
Marriott Marquis Chicago Hotel - Water Towers Room A & B

We are in the midst of two important global trends. First, the pace with which technology is advancing is more rapid than at any other point in human history. Second, the number and proportion of older adults in the population will be larger than at any other time in human history. How will these two trends intersect in the near future? The CONA Conversation Hour will feature luminaries in the field of aging and technology and will charge them with the task of predicting the benefits, and potential pitfalls, for older adults as society becomes increasingly digital. Four excellent presenters will spark the conversation: Anne C. McLaughlin, PhD, North Carolina State University; Neil Charness, PhD, Florida State University; Wendy A. Rogers, PhD, The University of Illinois, Urbana-Champaign; and Joseph E. Gaugler, PhD, University of Minnesota.
