

COURSE: Career Counseling - Matthew Diemer

Course Rationale: Career counseling and career development are a specialty area that set apart the field of counseling from other mental health professions. Career development theory and career counseling may assist the public and our clients in finding a sense of meaning and economic empowerment through the world of work. Because work and career provide access to power, opportunity, and resources, career counseling and career development theory can play a critical role in the distribution of resources, opportunity, and power at the local, national, and international levels.
