

Worksheet: Planning for Trustworthiness in My Study

Type of Trustworthiness	Strategy	Rationale	Example citation	How they did it	My plans
Credibility	Member Checking	This will ensure that I capture participants' actual lived experiences and do not misinterpret them	Smith, 2016	They shared findings with 25% of their sample. When a participant disagreed he/she was reinterviewed to gain a better understanding, and codes were altered to be more accurate. This process was reported in the Data Analysis section.	I will follow these procedures except I will share findings with only 10% of my sample because I only have only a semester to complete my project.
