
APPENDIX 7.1: Digital Health Presentation

Student Name:

Presentation Date:

Presentation Topic:

Grade: [Student Score]____/30

Graded Categories:

- Presentation is of appropriate length (20–30 minutes) and provides opportunities for questions and discussion by the class: 3 points.
1 = insufficient length, too brief; 2 = somewhat inappropriate; 3 = appropriate.
- Presentation provides a clear overview of the product: 4 points.
- Presentation provides an overview of a health domain or problem that the product aims to solve: 2 points.
- Presentation covers the issue of credibility (What scientific evidence, either direct or indirect, supports the digital health product?): 5 points.
0 = not addressed; 1 = insufficient; 3 = moderately addressed; 5 = fully addressed.
- Presentation covers issues of user experience (How usable/easy to use is the product? What are considerations for diverse audiences/populations?): 5 points.
0 = not addressed; 1 = insufficient; 3 = moderately addressed; 5 = fully addressed.
- Presentation covers the issue of data security and privacy (Are there actual or hypothetical privacy concerns? Did the presentation consider the terms of service or privacy policy?): 5 points.
0 = not addressed; 1 = insufficient; 3 = moderately addressed; 5 = fully addressed.
- Clarity of the presentation: The presentation is well-organized and there is sufficient use of visual aids, for example, slides or demonstration videos: 4 points.
- Capacity to answer questions: The presenter is able to respond to questions: 2 points.

Topic	Possible points	Points received
Length	3	
Overview of product	4	
Overview of health area	2	
Credibility	5	
User experience	5	
Data security and privacy	5	
Clarity	4	
Questions	2	
Total	30	

Feedback will be provided on the following areas:

Summary and synthesis:

Positives:

Areas for improvement:

Conclusions:

APPENDIX 7.2: Sample Discussion Questions

1. How did you find the information they used to evaluate the quality of the app? What information was hard to find?
2. How did you go about evaluating the app?
3. What aspects of an app are most important to consider and why?
4. What are the warning signs for an app that should not be recommended for use?
5. Would you use this app long-term? Why or why not?
6. Would you recommend it to other people, and if so, for what?
