

Chapter 2

1. Why is knowledge of unconditioned behavior important for the analysis of learning?
2. What is the reflex arc, and who originated this concept?
3. What is a modal action pattern?
4. What is a sign stimulus?
5. What is a supernormal stimulus?
6. Why is the concept of motivation required to characterize species-typical behavior?
7. In what ways do appetitive and consummatory responses differ?
8. What are the primary characteristics of behavior systems?
