

Chapter 4

1. What are four common preparations for the study of classical conditioning?
2. What types of responses can be conditioned with Pavlovian procedures?
3. What is the distinction between S-R and S-S learning mechanisms?
4. How do US devaluation and US inflation manipulations help decide between S-R and S-S learning?
5. How does Pavlovian conditioning depend on the type of CS that is used?
6. Why is it necessary to have control procedures for Pavlovian conditioning?
7. How is Pavlovian conditioning involved in nursing and maternal behavior?
