

Chapter 8

1. What does the slope of a cumulative record represent?
2. How are ratio schedules different from interval schedules of reinforcement?
3. What is a feedback function?
4. How do feedback functions differ for interval schedules and ratio schedules?
5. What is a concurrent schedule, and what rule governs behavior on concurrent schedules?
6. What is the Matching Law?
7. What is a concurrent-chain schedule? How does it differ from a concurrent schedule?
8. How can a chained schedule be used to study self-control?
9. What is a delay discounting function and how can it explain lack of self-control?
