OTHER DEPARTMENT/ NOT SPECIFIED						
Research Grants	78	30	100	64	33	16
Clinical Work	65	50		65	21	2
Both	75	50	100	75	29	4

Source: 2003 Medical School / Academic Medical Center Psychologists Employment Survey
Research Office, American Psychological Association. 2004.

Note: Statistics represent the percentage of salary that medical school psychologists are required to earn through clinical work, research grants, or both. Only respondents who reported that they are required to earn a proportion of their salary through one or both of these means have been included in this table. In categories where the N is low, statistics should be viewed with caution.
