Most teaching positions (94.5 percent) were within educational institutions. Table 8 presents salaries in teaching positions by sector and type of educational institution. Psychologists employed in teaching positions at private educational institutions (\$70,000) were paid more than those in public educational institutions (\$60,000). Median salary was also higher for teachers in 4-year colleges (\$63,000) than in pre-school/elementary/secondary schools (\$55,500).
